

AMENDMENTS TO THE SPECIFICATION

Please replace the following paragraphs of the specification.

K. de Koning and Y. van de Vorst state in Automatic milking —~~chances~~changes—and ~~challenges~~chances, Proceedings of the British Mastitis Conference (2002) Brockworth, pp 68-80 Institute for Animal Health/Milk Development Council, that automatic milking relies on the cow's motivation to visit the automatic milking system more or less voluntarily. The main motive for a cow to visit the automatic milking system is the supply of concentrates; therefore automatic milking systems are typically equipped with concentrate dispensers.
